| MM2               | Employment chapter Policies SA4, 5 and 6 and supporting text Pages 21-27 inclusive | **Background**

4.15 Economic development is a priority for North Somerset as it has suffered from low levels of economic activity in recent years relative to high levels of residential development. This has contributed to high levels of out-commuting, and unsustainable development patterns and a key objective of the Core Strategy is to address this imbalance.

4.16 The Junction 21 Enterprise Area is stimulating economic growth in Weston-super-Mare, increasing investment in the area and the creation of new employment and enterprise. This is one of a number of Enterprise Areas established across the West of England and recognised by the West of England Local Enterprise Partnership (LEP) as priority areas for investment and business growth. The | Delete all background and supporting text and Policies SA4, SA5 and SA6. Replace with redrafted chapter and policy. Incorporates Inspector’s proposed modification to bring policy in line with NPPF. |
Weston EA covers an area subject to significant change encompassing the Weston Villages development, and sites around Junction 21 of the M5 motorway.

4.17 Planning has a key role in facilitating economic growth both in terms of the development strategy for this area as identified through the various planning documents and in terms of any additional measures that can be utilised including the use of Local Development Orders.

4.18 There are existing sites allocated within this area for business use and additional sites have been granted planning permission primarily at the Weston Villages for economic development. A revised set of land use allocations is proposed through this plan updating the employment allocations. These sites form the main planned business areas within the Enterprise Area where business growth will be located.

4.19 The delivery of the ambitions at the J21 area is related to the wider development strategy in the town to secure employment-led growth where new housing will be provided in tandem with employment development. Significant investment has been made and is planned to enable employment site delivery.

Requirements for allocated land

4.20 An Economic Development Needs Assessment (EDNA) has been prepared in 2015 to identify the need for economic land across the wider Functional Economic Market Area (FEMA) covering the West of England. A breakdown of need was also provided for each of the
constituent authorities including North Somerset. This identified land requirements for the period 2016 to 2036 thereby including the 10 remaining years of the Site Allocations Plan.

4.21 This updates earlier work the Council commissioned to ascertain economic growth to inform the preparation of the Core Strategy and indicates a marginally increased growth rate and resulting demand for land.

4.22 The land supply provided in the Site Allocations Plan is sufficient to meet the requirements of the Core Strategy to achieve at least 10,100 jobs to 2026 taking into account that a significant proportion of these will already have been achieved between 2006 and 2015.

Allocated sites
4.23 The allocations are mostly carried forward from the previous Replacement Local Plan (2007) amended to take into account any completed parts or further information. This has been informed by a review of the allocations that has considered the suitability of the sites for ongoing allocation in the Development Plan. A background evidence paper (Review of employment allocations Oct 2015) provides a qualitative assessment of the extant NSRLP employment allocations in order to help determine a realistic supply of potential employment land from this source and to inform decisions regarding their future allocation in the Sites Allocations Plan.

4.24 Each site has been assessed taking into account a range of factors to gain a broad understanding of the site
characteristics and scope for future delivery. A broad guide to this assessment is whether, in line with the National Planning Policy Framework, the site has a ‘reasonable prospect’ of being delivered for its intended use. Each site is scored and ranked to provide a comparison across the range of sites.

4.25 Factors that have been assessed to determine the suitability of each employment allocation are:

- Proximity to urban areas (sequential approach)
- Site visibility
- Market attractiveness
- Strategic access
- Proximity to train station and or bus connections
- Development and environmental constraints
- Compatibility with adjoining uses

4.26 New allocations have been proposed including at Weston Villages to reflect the emerging development proposal there. There will be a presumption of protection over these sites by virtue of their allocation and only when the criteria are satisfactorily addressed will it be justified to develop the site for alternative uses.

Proposed Employment Sites

4.27 The Core Strategy set out the aspiration to create more sustainable places, both existing and new, by increasing the range of jobs and local prosperity in North
Somerset. At the same time the influence of Bristol must be recognised as a major economic centre, and the choice, and mobility of residents and the labour force within the West of England sub-region. So whilst North Somerset operates in the context of a wider functional economic market characterised by clear and long established commuting patterns, there is a need to ensure development in North Somerset is sustainable and that residents have access to a range of local employment, and local businesses have opportunities to set-up, and expand whilst protecting the valued natural environment.

4.28 Employment development is directed to the main areas of population growth linking to the underlying strategy of aligning jobs with homes in key areas. This has the potential to reduce the levels of out-commuting and increase self-containment bringing additional spin-off benefits including reducing carbon emissions from dispersed development due to increased car use.

4.29 This is particularly relevant at Weston where the strategic policy approach has for many years sought to achieve a greater alignment between jobs and homes. The Core Strategy and other plans seek to reinforce this principle through ensuring that new housing is provided in step with job growth, that the existing backlog is addressed over the plan period and key under-represented sectors (particularly offices) are supported.

4.30 Policy SA 4 below provides a schedule of proposed employment sites which are allocated for B1, B2 and B8 use.
4.31 The Council will consider providing additional detail relating to the deliverability of the allocated employment land supply. It is clear that not all supply is equal and readily deliverable and therefore the overall supply is not always a reasonable indicator when considering the scale of land supply available for business needs. Sites may require significant investment to unlock and may have a long lead-in time particularly if linked to a wider regeneration strategy in an area.

POLICY SA 4
Land in Schedule 2 is allocated for new business development (B1, B2 and B8 use). Proposals for non-B use classes on these sites will be permitted if:

- they are ancillary to the main B use
- they are small scale, making up no more than 15% of the site area overall and provide a supporting service for the employment uses or employees e.g. crèche, gym café etc
- their development would not lead to the site becoming unsuitable for the intended employment uses,

In cases where the above criteria are not met,
- it can be demonstrated that the planned B Class use is not suitable and that there is no realistic prospect of the site coming forward for its planned use,
the range and quality of land available to meet future business needs is not adversely impacted.

SAFEGUARDED EMPLOYMENT SITES

Background
4.32 As well as allocating new employment sites it is equally important that existing employment sites that have good access are purpose-built, modern and compatible with surrounding uses are retained in employment use. In the past existing sites have been lost to non-employment uses which does not help to redress the balance between residential growth and provision of jobs. For some sites that are poorly located, rundown or incompatible with surrounding uses then their loss to non-employment use is acceptable and in some cases a benefit. However the loss of key existing strategic employment sites would be contrary to Core Strategy objectives.

POLICY SA 5

Existing employment sites listed in Schedule 3 are safeguarded for business development (primarily B1, B2 and B8 use). Proposals for non-B uses classes on these sites will only be permitted if:

- they are ancillary to the main B use
- they have a direct relationship with the existing businesses by providing a service to the business or employees; or
they are very small scale and provide a supporting service for the employment uses or employees e.g. crèche, gym café etc

RETENTION OF ECONOMIC USES

Background

4.33 In general it is desirable to maintain the overall stock of land and premises available to meet business needs over the plan period and beyond, not only those specifically allocated or safeguarded. It is recognised that due to pressures from competing, often higher value land uses, and weakened demand at periodic times throughout the economic cycle, that often such land is under pressure to be developed for other uses. This can threaten the sustainable balance of land uses in certain areas, reducing local employment opportunities, increasing the need to out-commute, and impacting on the vitality and viability of areas. It also tends to have a cumulative impact that can be problematic in certain locations affecting the ability to achieve policy aspirations.

4.34 However under certain circumstances the loss of a site to other uses may be the only viable or suitable option for the site, particularly with a view to maximising the efficient use of land. Commercial property demands are changing both in terms of the types of premises and their location reflecting changing economic characteristics, not least the rapid increase in online shopping, the ability to work remotely including home-working, and the shifts in the economy e.g. from service based economy to manufacturing.
4.35 The planning system therefore has a role to play in recognising and facilitating these shifts and offering a land supply that can respond to these conditions. Policy SA 6 therefore allows for existing economic sites to be developed for other uses provided certain conditions are met. This is considered to be in line with the principles of the NPPF and reflects the earlier tried and tested policy approach established in the North Somerset Replacement Local Plan.

**POLICY SA 6**

Land in existing economic use will be permitted to change to an alternative use where it can be demonstrated that:

- the loss of the site would not harm the range or quality of sites available for business use across North Somerset and,
- by way of marketing or other means as agreed with the Council, the site does not offer a suitable location for the existing use, no alternative economic use can be secured appropriate to the site, and there is no realistic prospect of it being used in the plan period for the intended use, and,
- the loss of the site would not adversely impact the ability to achieve wider economic aspirations including regeneration, business growth, and improved commuting patterns.

The Council will consider removing certain Permitted Development rights when granting planning permission for new economic development in order to...
### Background

Economic development is a priority for North Somerset as it has suffered from low levels of economic activity in recent years relative to high levels of residential development. This has contributed to high levels of out-commuting, and unsustainable development patterns and a key objective of the Core Strategy is to address this imbalance.

The Junction 21 Enterprise Area (J21EA) is stimulating economic growth in Weston-super-Mare, increasing investment in the area and the creation of new employment and enterprise. This is one of a number of Enterprise Areas established across the West of England and recognised by the West of England Local Enterprise Partnership (LEP) as priority areas for investment and business growth. The J21EA covers an area subject to significant change encompassing the Weston Villages development, and sites around Junction 21 of the M5 motorway.

Planning has a key role in facilitating economic growth both in terms of the development strategy for this area as identified through the various planning documents and in terms of any additional measures that can be utilised including the use of Local Development Orders.

</table>
The land supply provided in the Site Allocations Plan is sufficient to meet the requirements of the Core Strategy to achieve at least 10,100 jobs to 2026 taking into account that a significant proportion of these will already have been achieved between 2006 and 2015.

**Proposed Employment Sites**
The Core Strategy set out the aspiration to create more sustainable places, both existing and new, by increasing the range of jobs and local prosperity in North Somerset. At the same time the influence of Bristol must be recognised as a major economic centre, and the choice, and mobility of residents and the labour force within the West of England sub-region. So whilst North Somerset operates in the context of a wider functional economic market characterised by clear and long established commuting patterns, there is a need to ensure development in North Somerset is sustainable and that residents have access to a range of local employment, and local businesses have opportunities to set-up, and expand whilst protecting the valued natural environment.

Employment development is directed to the main areas of population growth linking to the underlying strategy of aligning jobs with homes in key areas. This has the potential to reduce the levels of out-commuting and increase self-containment bringing additional spin-off benefits including reducing carbon emissions from dispersed development due to increased car use.

This is particularly relevant at Weston-super-Mare where the strategic policy approach has for many years sought to
achieve a greater alignment between jobs and homes. The Core Strategy and other plans seek to reinforce this principle through ensuring that new housing is provided in step with job growth, that the existing backlog is addressed over the plan period and key under-represented sectors (particularly offices) are supported.

Policy SA 4 below provides a schedule of proposed employment sites which are allocated for B1, B2 and B8 use.

The Council will consider providing additional detail relating to the deliverability of the allocated employment land supply. It is clear that not all sites are equal and readily deliverable and therefore the overall supply is not always a reasonable indicator when considering the scale of land supply available for business needs at any one point in time. Sites may require significant investment to unlock and may have a long lead-in time particularly if linked to a wider regeneration strategy in an area.

The allocations are mostly carried forward from the previous Replacement Local Plan (2007) amended to take into account any completed parts or further information. This has been informed by a review of the allocations that has considered the suitability of the sites for ongoing allocation in the Development Plan. A background evidence paper (Review of employment allocations Oct 2015) provides a qualitative assessment of the extant NSRLP employment allocations in order to help determine a realistic supply of potential employment land from this
source and to inform decisions regarding their future allocation in the Site Allocations Plan.

Each site has been assessed taking into account a range of factors to gain a broad understanding of the site characteristics and scope for future delivery. A broad guide to this assessment is whether, in line with the National Planning Policy Framework, the site has a ‘reasonable prospect’ of being delivered for its intended use. Each site is scored and ranked to provide a comparison across the range of sites.

Factors that have been assessed to determine the suitability of each employment allocation are:

- Proximity to urban areas (sequential approach)
- Site visibility
- Market attractiveness
- Strategic access
- Proximity to train station and or bus connections
- Development and environmental constraints
- Compatibility with adjoining uses.

New allocations have been proposed including at Weston Villages to reflect the emerging development proposals there. These sites together with existing business sites in the B use classes will be protected under Policy SA4 and only when the policy criteria are satisfactorily addressed will it be justified to develop the site for alternative uses.

Retention of Economic Uses
| In general it is desirable to maintain the overall stock of land and premises available to meet business needs over the plan period and beyond, not only those specifically allocated or safeguarded. It is recognised that due to pressures from competing, often higher value land uses, and weakened demand at periodic times throughout the economic cycle, that often such land is under pressure to be developed for other uses. This can threaten the sustainable balance of land uses in certain areas, reducing local employment opportunities, increasing the need to out-commute, and impacting on the vitality and viability of areas. It also tends to have a cumulative impact that can be problematic in certain locations affecting the ability to achieve policy aspirations.

However under certain circumstances the loss of a site to other uses may be the only viable or suitable option for the site, particularly with a view to maximising the efficient use of land. Commercial property demands are changing both in terms of the types of premises and their location reflecting changing economic characteristics, not least the rapid increase in online shopping, the ability to work remotely including home-working, and more general shifts in the economy and implications for land supply.

The planning system therefore has a role to play in recognising and facilitating these shifts and offering a land supply that can respond to these conditions. Policy SA4 therefore allows for existing business sites to be developed for other uses provided certain conditions are met. This is considered to be in line with the principles of the NPPF and reflects the earlier tried and tested policy approach |
established in the North Somerset Replacement Local Plan.

POLICY SA4

Within existing B1–B8 business employment areas, as well as land identified on the Policies Map and in Schedule 2 for business employment development, proposals for unrelated non B1–B8 development will be permitted where it can be demonstrated that the loss of the site would not adversely impact the ability to achieve wider economic aspirations including regeneration, business growth, and improved commuting patterns; and

i. the proposal would not harm the range or quality of land and premises available for business use development within existing employment areas or expressly identified in the Plan to meet business needs; or

ii. where there is a specific requirement associated with neighbouring business uses, and the development would not lead to the overall site becoming unsuitable for the current or allocated employment use; or,

iii. through demonstration of effective marketing of the site or premises, the site is no longer capable of offering accommodation for business use development, or that the proposals would lead to the
removal of incompatible development, resulting in greater potential benefits to the community in terms of environmental benefits, significant improvements in the amenities of existing neighbouring residents or contribute to a more sustainable pattern of development that would outweigh the loss of employment capacity in the locality.

The Council will consider removing certain Permitted Development rights when granting planning permission for new business development in order to avoid the future loss of these uses.

| MM3 | Policy SA8 undesignated green space Paragraph 4.45 (page 30) | UNDESIGNATED GREEN SPACE

**Background**

4.44 Protection of green spaces which are of value with regard to their contribution to the townscape, character, setting and visual attractiveness of a settlement is consistent with NPPF paragraph 7. Such green spaces often make an important contribution to the network of green infrastructure within settlements and the approach is consistent with NPPF paragraph 114 and paragraph 027 of the natural environment section of the National Planning Practice Guidance.

4.45 This policy will apply to areas of undesignated green space (those not identified as Local Green Space under policy SA 7.5) within settlements with defined

Policy is reworded to make it more positive and to reflect NPPF paragraph 114 which emphasises the importance of planning positively for green infrastructure networks. Addition to supporting text to aid clarification in terms of the application of the policy.
settlement limits, which are considered nevertheless to be of value in making a worthwhile contribution to the townscape, character, setting and visual attractiveness of the settlement. Townscape is a term embracing a number of factors, such as the importance of green space in the street scene, in breaking up and adding variety within the urban fabric and in enhancing the setting of buildings and other features. The assessment of whether the effect of the development is acceptable or not in terms of the impact on green infrastructure should be made with regard to its effect on the value of the site for amenity, and/or the townscape, character, setting and visual attractiveness of the settlement.

POLICY SA 8.6

Undesignated green space

Within settlements planning permission will not be granted for development that unacceptably affects the value of undesignated green space making a worthwhile contribution to amenity and/or the townscape, character, setting and visual attractiveness of the settlement.

Development proposals affecting undesignated green spaces will be acceptable provided they do not have a detrimental impact on green infrastructure by adversely affecting spaces which make a worthwhile contribution to amenity and/or the townscape,
**character, setting, visual attractiveness of the settlement.**

coordination with neighbouring developers to ensure the site is developed appropriately as part of a wider strategic growth area. Trees to be retained as part of an open space feature/corridor. Requires retention of strong hedge boundaries throughout the site. Pedestrian links to footpath on northern boundary. Vehicular access from western boundary. Full Transport Assessment required. Consideration of fact that site is within 5km consultation zone for Bats SAC. Ecological issues to be addressed on a strategic basis as part of any future wider development. Proposals to provide a mix of housing in accordance with Policy DM35 of the Sites and Policies Plan Part 1: Development Management Policies. Proposals will require a Coal Mining Risk Assessment. Sufficient space to be allowed for effective access for maintenance of watercourses and surface water drainage features.

| MM22 | Schedule 1 (page 50) Severn Paper Mill | New Allocation – previously allocated employment site A Flood Risk Assessment, sequential and exception test will need to accompany any planning application Small part of site to be reserved for employment as per application 16/P/1608/F Flood plain compensation required (Fluvial FZ3). | Amendments to reflect proposed scheme and Environment Agency comments. |
| MM23 | Schedule 1 (page 50) Old Mill Road | Old Mill Road* No current consent 20 0 | Amendments to wording to reflect Environment Agency comments, and changes following discussion at |
New allocation. Proposed as a mix of employment uses, retail, leisure, café’s, bars, and restaurants and some residential units. Pedestrian/cycleway links to dockside development, adjacent supermarket and proposed rail station required. Existing businesses to be relocated or incorporated into redevelopment scheme. No net loss of employment capacity will be supported. A Flood Risk Assessment, sequential and exception test will need to accompany any planning application. Flood plain compensation required (Fluvial FZ3).

Vacant site.
Residential development above ground floor commercial use.
A Flood Risk Assessment, sequential and exception test will need to accompany any planning application.

| MM27 | Schedule 1 (page 52)  
Yatton Station | New allocation.  
Improved capacity of existing railway car park required as part of development proposal.  
The west part of the allocated housing site includes a small part of a very large local Wildlife Site (the Congresbury Yeo, adjacent land and rhynes Wildlife Site). West of but adjacent to the allocated housing site, and also partly falling within the Wildlife Site, is the Cheddar Valley Railway Walk Local Nature Reserve (along the Strawberry Line cycle path). Given the existence of these designated areas, it is important that development proposals for the allocated housing site incorporate an appropriate wildlife buffer to be safeguarded and managed for the benefit of wildlife. Ecological issues will be a significant factor in any future planning application.  
Higher standard of surface water attenuation and run off required. | Changes to address ecological concerns. | through further assessment process and recommended for inclusion following Executive Committee 5 September 2017 |

| MM28 | Schedule 1 (page 56)  
Moor Road, Yatton | New allocation.  
Layout to respect Grange Farm (Listed Building).  
No development in the orchard.  
The provision of an access road across the orchard will only be considered if alternative access arrangements cannot be made and subject to a suitable scheme being agreed with Natural England. Should a suitable scheme | Changes as agreed at the 7th February 2017 Executive Committee in response to Natural England concerns. |
